VolkerRail's On-Track Machine (OTM) Ballast Regulator fleet consists of :

- 1 x Matisa R24s Ballast Regulators 801
- 1 x Matisa R24s Ballast Regulators 802

VolkerRail's OTM Ballast Regulating fleet provides specialist ballast formation requirements for both renewals and maintenance activities and are operated by an experienced team of driver maintainer operators who have undergone a comprehensive training programme; enabling efficient and reliable delivery of operations in excess of 99%.

Used extensively by Network Rail, our Ballast Regulators provide:

- State of the art regulating equipment
- Expertise and experience in regulating
- Proven ability to deliver a reliable safe and efficient service
- A driver maintainer/operator philosophy
- A focus on customer requirements
